Letter of Recommendation

November 16, 2012

To whom it may concern:

This letter is to confirm that Megadrill has purchased and is currently operating a Top Drive Manufactured by GDS International. The unit is on the Barge Drilling Rig Majestic operating in Nigeria under a long term contract. The Top Drive was delivered in October 2011 and installed in January 2012 during the construction of the Majestic. The unit has been operating without incident to date. We have been pleased with the Ruggedness of the Top Drive and the user friendly and advanced control, maintenance and monitoring built into the system. To date we have had no downtime with this unit.

We are very satisfied with both the service and professionalism that GDS has provided. We have had a very long standing relationship with the principals at GDS and we will continue to use GDS Top Drives in the future; including one scheduled for later this year. Based on this experience we feel confident in recommending GDS for the manufacture of new Top Drives and the service of all other major brands.

Sincerely,

Robert Dunn,
President
