Unit Drilling Letter of Recommendation:

Service & Repairs Team,

On two separate occasions, the GDS team has gone above and beyond for us by completing emergency repairs at their Houston facility in less than a week on our TDS11s. Your sense of urgency and eagerness to assist us in this matter did not go unnoticed. It is because of your hard working service and repairs team that we are able to get our rig back up and running in the least amount of time possible. GDS has saved us valuable time and money. Both of the machines returned to the field and have been running to our satisfaction. We are eager to work with GDS and will be sending them more repair units in the days to come.

Sincerely,

Dallas Dahlenburg
Top Drive Supervisor
