

Forum Energy Technologies and GDS Middle East have entered into a Master Service Agreement (MSA), which will expand Forum's service and maintenance capabilities in the Middle East region. Forum and GDS have worked closely together in the past, and are excited about the opportunity to expand our relationship and better serve our customer needs.

As Forum continues to grow its footprint and portfolio within the Middle East, GDS is able to immediately dispatch highly skilled technicians who will respond to their needs and minimize downtime and costs. GDS has regional workshop facilities in Dubai, Saudi Arabia, North Iraq and Algeria.

This MSA will provide an even greater level of service throughout the region. With proven reliability and success, we look forward to supporting any aftermarket sales and service requirements.

Forum Energy Technologies is a global oilfield products company, with a vast selection of drilling solutions, including iron roughnecks, hydraulic catwalks, pipe spinners, cranes and a full range of aftermarket parts.

GDS provides:

- Newly manufactured GDM top drives, ranging from 275 to 1,000 ton
- Used top drive and spare parts sales
- Top drive CAT IV inspections on all makes and models
- Yearly top drive inspections and IP15 upgrades
- Mobile top drive dyno testing
- Audit inspections, using a proprietary app for top drives, catwalks, and drawworks
- DROPS survey's utilizing internal software
- Z-Torque systems (newest Soft Torque system by Shell)
- Engineering services and rig integration projects
- Field Service
- Repair, Rebuild and Refurbishment Services
